## Scocche in legno - Wooden shells

---

Il design e il calore del legno sono i veri protagonisti delle scocche Legnokit. Forme sinuose si alternano a linee pulite per adattarsi ad ogni tipo di arredamento di interni. Le scocche Legnokit sono prodotte principalmente in multistrato di faggio. A richiesta è possibile rifinirle in varie versioni: verniciate, tinte, laccate, in laminato, con precomposti e rivestite in pelle o rigenerato. Prerogativa di Legnokit, oltre alla qualità, è la possibilità di personalizzare il prodotto su disegno del cliente.

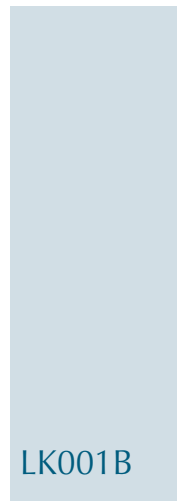

*The design and warm effect of the wood are the main features of the Legnokit shells. Curved forms alternate with clean-cut lines to adapt to all types of interior furnishing schemes. The Legnokit shells are produced mainly in plywood beech. On request they can be finished in various versions: painted, dyed, lacquered, in laminate, with high quality rotary veneer or upholstered in leather or bonded leather. In addition to quality, a further prerogative of Legnokit is thenly in plywood beech. On request they can be finished in various versi.*
